

# CleanSpect

Digitize your cleaning operations to save time and improve transparency.

## Intro

### About Us

#### Consistent cleanliness, guaranteed quality – verified cleaning.

Our cleaning inspection service helps ensure that your contracted cleaning team truly meets the expected standards. Using objective criteria, a digital system, and documented inspections, we provide continuous quality control—so you can focus on your own priorities.

### Functionalities

#### Worklogs

Area-based log entries to verify the start and completion of cleaning tasks by scanning QR codes or NFC tags.

#### Inspection

Quality monitoring with structured inspection reports.

#### Timesheet

Employees record the start and end of their daily work by scanning QR codes or using iBeacons.

#### Cleaning coordination

Posts are organised according to a work plan, with detailed task lists for each area and flexible scheduling on a daily, weekly, or monthly basis.

#### Analytics

Inspection report analysis, automated performance confirmation, real-time tracking, and attendance log access.

### Technical features

**Cross-platform availability** – A mobile application available on both Android and iOS.

**Web portal** – Easy access to cleaning logs, attendance records, and cleaning inspection reports.

**Continuous updates** – The platform is continuously available and evolves based on user needs and feedback.

### Benefits for management

- Real-time task tracking
- Transparent and searchable data
- More efficient inspections and documentation
- Easy data export and client communication

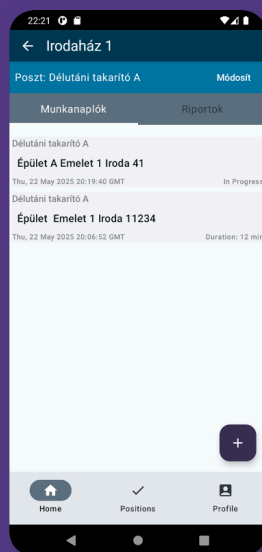

# Mobile application

## Worklogs

Start and complete tasks per area by scanning QR codes. Area-specific daily, weekly, or monthly tasks are defined based on the cleaning plan.

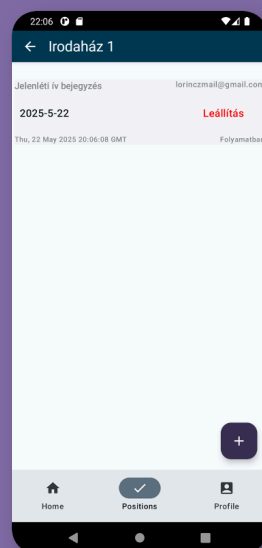

Real-time listing of entries from the past 6 hours for supervisors and clients.

## Timesheet

Start and stop daily attendance tracking by scanning QR codes or being near an iBeacon.

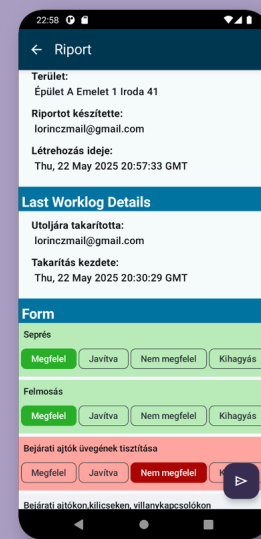

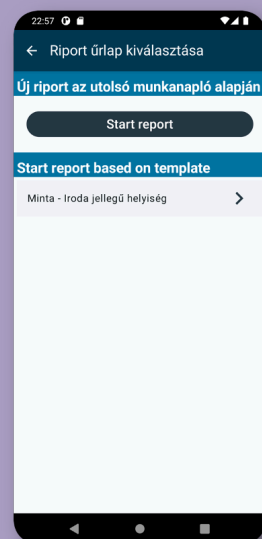

Listing of entries created in the past 12 hours for supervisors and clients.

## Inspect

Area-based cleaning inspection reports for supervisors and clients via QR code scanning.

Cleaning inspections performed according to predefined templates or the cleaning plan.

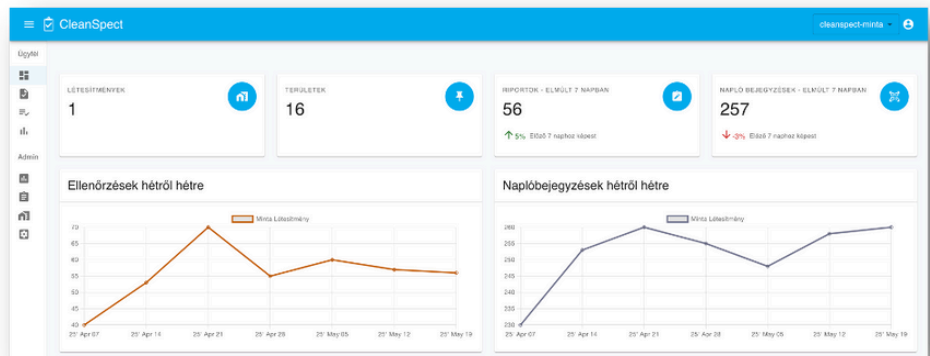

# Web Portal - most important features

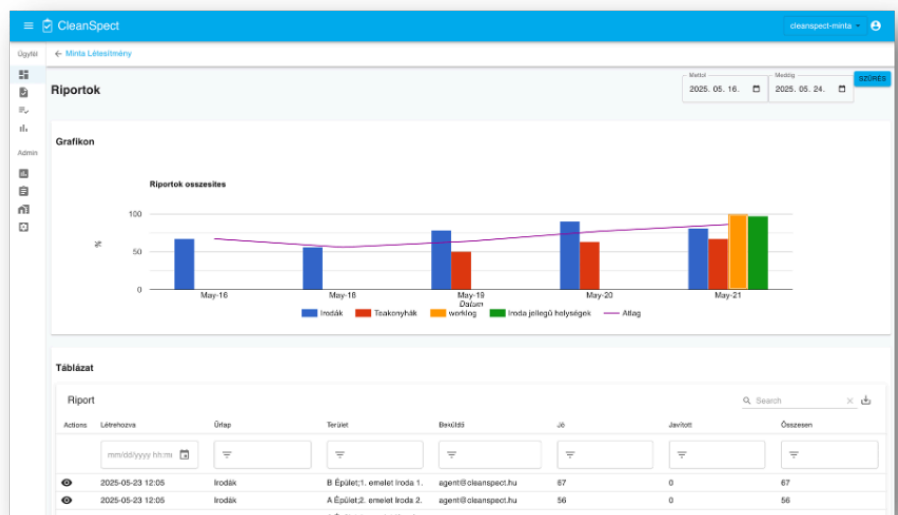

## Dashboard

Log entries and reports organized on a weekly basis

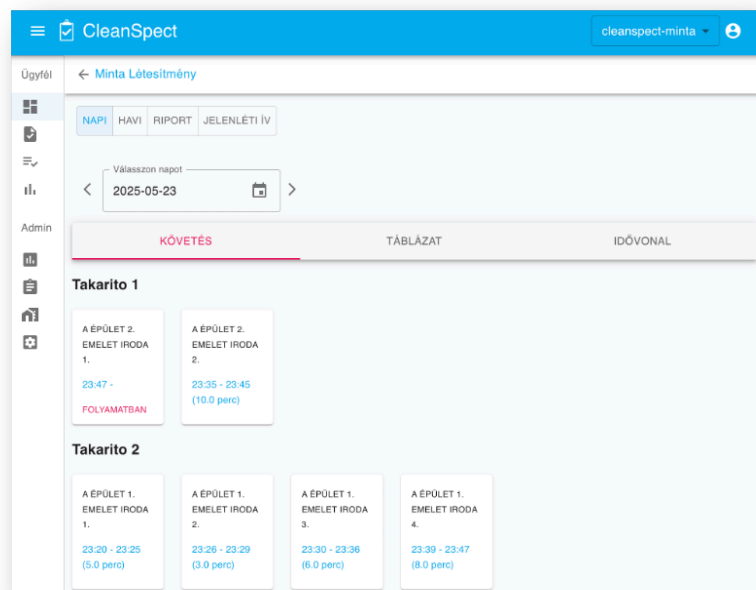

## Reports

Reports created by supervisors and clients are tracked to demonstrate continuous quality improvement

## Worklogs

- **Daily** (Tracking, Table, Timeline)
- **Monthly** (Tabular summary)
- **Reports** (All entries in a tabular view)
- **Attendance log** (Tabular view)
